METALLURGY GRANT AWARDED

Transition Minerals Limited is pleased to advise it has been successful in round 17 of the Northern Territory Geophysics and Drilling Collaborations program, to advance geological understanding and resource development in the Territory.

The competitive co-funding grant is sponsored by the Northern Territory Government's Resourcing the Territory program and is administered by the Northern Territory Geological Survey. Transition Minerals applied for the grant under the "Advancing critical minerals projects" category, for early-stage metallurgical test work and/or ore characterisation to assess potential recoverability of critical minerals from mineralised material.

The company has been awarded the maximum allowable grant of \$50,000 (including GST).

Metallurgical test work proposed pursuant to the grant application includes, but is not limited to:

- multi-gravity separator test work;
- wet high intensity magnetic separation test work;
- batch flotation test work;
- heat treatment and ammonium sulphate leaching test work; and
- proprietary pyrophosphoric acid treatment test work.
